

# MEGI®-Cones

**Megi cone**  
**Part No. 786 025 S1**  
**Versions:**  
**hard, medium, soft**

Special version for use as piston engine bearings. These cones have transverse radial recesses so that they are much softer in the transverse direction than in the longitudinal direction.

Other dimensions and materials are available on request

Max. tension force of central threaded mount on inner section of cone  
 $F_V = 40$  kN.
